

Integrity Reporting Practitioner — Closed Cases

Initial Cred Review — Field Mapping Overview

Audience: Business stakeholders, Integrity Reporting team, Credentialing Operations

Prepared:
June 2026

1. What this report shows

Every Approved **Initial Credentialing** case for an individual physician, with one row per *tracked field change* (App Review, PSV, and key administrative events). The same header information about the case and practitioner is repeated on every row of that case so the data can be filtered, pivoted, or audited any way the business needs.

Cohort included

A case appears in this export only when **all** of the following are true:

Filter	Plain-language meaning
Case is Approved	The credentialing decision has been made and closed
Record Type = Practitioner Participation Request	This is an <i>initial</i> credentialing case (not Re-Cred, Ancillary, etc.)
Practitioner is a Person Account	The case is about an individual physician, not a facility or group
Decision Date falls in the requested window	The reporting window — typically a calendar quarter or year-to-date

Why this cohort

These four filters together produce the "Individual Physician — Full/Initial — Approved" group that the legacy Excel feed already shows in columns 2, 3, and 4. The new report keeps the same scope so existing dashboards and historical comparisons remain valid.

2. Column-by-column source mapping

The table below shows where each of the 18 columns comes from. "**Source**" is the Salesforce object and field that holds the value. "**Notes**" explains anything non-obvious.

#	Column	Source	Notes
1	Case ID	Individual Application — Name	The IA-NNNNNNNN case number.
2	Cred Body	Constant: <code>Individual Physician</code>	Derived from the cohort filter (Person Account + Practitioner Participation record type).
3	Status	Individual Application — Status	Always <code>Approved</code> for this tab — the closed-case filter.
4	Credentialing Type	Constant: <code>Full/Initial</code>	Derived from the record type (<code>Practitioner Participation Request</code> ⇒ Full/Initial; <code>Re-Credentialing</code> ⇒ Re-Cred).
5	Practitioner ID	Account → Practitioner Number → Name	The 11-digit IBX practitioner identifier.
6	Practitioner NPI	Healthcare Provider NPI — NPI <i>(Individual NPI tagged to the practitioner's Account; active row preferred when more than one exists)</i>	Standard Health Cloud NPI record on the Account. We deliberately do not filter on the <i>Active</i> flag — a small share of practitioners have only an inactive Individual NPI row tagged to their Account, and the legacy Excel feed never filtered on Active either.
7	First Name	Account — First Name	Person Account demographics.
8	Middle Name	Account — Middle Name	May be blank if not on file.
9	Last Name	Account — Last Name	Person Account demographics.
10	Current Attestation Date	Most recent CAQH Attestation field-change date for the practitioner across all their cases	Pulled from history, not a single field. Blank if the practitioner has never had an attestation event tracked.
11	Review Name	Individual Application History — Field	Friendly name (we strip the <code>PRM_</code> prefix and <code>__c</code> suffix). See §3 for the full list of 38 tracked fields.
12	Review Previous Value	Individual Application History — Old Value	What the field was before the change. Blank when this is the first time the field was set. Boolean fields show as <code>~</code> (legacy convention).
13	Review Current Value	Individual Application History — New Value	What the field changed to. The full list of values matches what users see in the Salesforce UI (e.g. <code>Data Looks Good</code> , <code>Not Applicable</code> , <code>PSV QC</code> , etc.).
14	Review Date	Individual Application History — Created Date <i>(date portion, GMT)</i>	When that specific field changed — the calendar date in GMT.

#	Column	Source	Notes
15	Review Time	Individual Application History — Created Date *(time portion <code>HH:mm:ss</code> , GMT)*	The time-of-day the field changed, in the same GMT timezone as Review Date so the two columns describe a single consistent moment. Together columns 14+15 give the full audit timestamp.
16	Applied Date	Individual Application — Applied Date	When the practitioner submitted their application.
17	Decision Date	Individual Application — Decision Date	Custom field on the case. The official decision date used for SLA reporting.
18	Processing Time	Individual Application — Case Manager Age	The case age in days, sourced directly from the Salesforce-managed <i>Case Manager Age</i> field (<code>PRM_CaseManagerAge__c</code>). The leading number is shown without the trailing <code>" days"</code> text so the column matches the legacy integer format.
19	Applied After Decision Flag	<i>Computed:</i> <code>Yes</code> if the field changed after the case was decided, else <code>No</code>	Audit signal — flags any review activity that happened after the case was closed.

3. The 38 tracked fields (column 11 detail)

These are the only Individual Application fields whose changes appear in the **Review Name** column. Anything outside this list is filtered out so the export stays focused on credentialing-relevant activity.

Application Review (10)

Review Name in export	Field on Individual Application
Attestation Verification	<code>PRM_AttestationVerification__c</code>
License Verification	<code>PRM_LicenseVerification__c</code>
Education Verification	<code>PRM_EducationVerification__c</code>
Specialty Verification	<code>PRM_SpecialtyVerification__c</code>
Malpractice Coverage Verification	<code>PRM_MalpracticeCoverageVerification__c</code>
DEA Verification	<code>PRM_DEAVerification__c</code>
CDS Verification	<code>PRM_CDSVerification__c</code>
Work History Verification	<code>PRM_WorkHistoryVerification__c</code>
NPDB Verified On	<code>PRM_NPDBVerifiedOn__c</code>
NPDB Error Message	<code>PRM_NPDBErrorMessage__c</code>

PSV / Reviews (17)

Review Name in export	Field on Individual Application
PSV Outcome	PRM_PSVOutcome__c
Contract Status	PRM_ContractStatus__c
CAQH Attestation	PRM_CAQHAttestation__c
Service Area PSV	PRM_ServiceAreaPSV__c
License PSV	PRM_LicensePSV__c
Specialty PSV	PRM_SpecialtyPSV__c
Admitting Privileges Review	PRM_AdmittingPrivilegesReview__c
Insurance PSV	PRM_InsurancePSV__c
Education PSV	PRM_EducationPSV__c
Work History PSV	PRM_WorkHistoryPSV__c
CDS PSV	PRM_CDSPSV__c
DEA PSV	PRM_DEAPSV__c
Board Certification PSV	PRM_BoardCertificationPSV__c
Disclosure Review	PRM_DisclosureReview__c
Medicare Opt-Out Review	PRM_MedicareOptOutReview__c
FSMB PSV	PRM_FSMBPSV__c
SAM Review	PRM_SAMReview__c
CMS Preclusion Review	PRM_CMSPreclusionReview__c

Operational / Administrative (11)

Review Name in export	Field on Individual Application
Approved Date	ApprovedDate (standard)
Approved Date (custom)	PRM_ApprovedDate__c
Re-Cred Due Date	PRM_ReCredDueDate__c
Created By Id	CreatedById (standard)
Case Data Manager	PRM_CaseDataManager__c
Display Cap Sites	PRM_DisplayCapSites__c
NPDB Received	PRM_NPDBReceived__c

Review Name in export	Field on Individual Application
NPDB Verified	PRM_NPDBVerified__c
Role Change Request	PRM_RoleChangeRequest__c
First Name	PRM_FirstName__c
Last Name	PRM_LastName__c

4. Sample row (illustrative)

Column	Value
Case ID	IA-0000021599
Cred Body	Individual Physician
Status	Approved
Credentialing Type	Full/Initial
Practitioner ID	10000237353
Practitioner NPI	1083292528
First Name	Aleksandr
Last Name	Abakulov
Current Attestation Date	2025-12-29
Review Name	License Verification
Previous Value	(blank — first time set)
Current Value	Data Looks Good
Review Date	2026-02-17
Review Time	15:16:14 (GMT)
Applied Date	2025-07-31
Decision Date	2026-03-26
Processing Time (Case Age)	306
Applied After Decision	No
